KEMTECH

CAPABILITY OVERVIEW

October 2026

Secure technology. Mission-focused delivery.

KemTechnology helps government and industry teams secure, operate, and modernize the systems their missions depend on.

CORE CAPABILITIES

Cybersecurity & information assurance

Vulnerability management, system hardening, security configuration, patch coordination, and operational reporting.

Enterprise IT & networks

Enterprise computing and storage, Windows and Linux systems, virtualization, and network operations.

Cleared mission support

Cleared technical staffing, systems and network engineering, cybersecurity support, and program coordination.

Business applications & integration

Leadership experience with Dynamics 365, Business Central, Power Platform, workflow automation, and API integration.

Applied AI & mission assurance

Concept-stage research in cybersecurity decision support, human oversight, independent verification, and controlled AI-agent recovery.

COMPANY AT A GLANCE

Veteran-Owned Small Business (VOSB)

Established 2006

CAGE / UEI

4BUW0 / CFAAHG29XEJ3

LEADERSHIP

Rory Williams

Founder & CEO | U.S. Navy veteran
